English 

Turkish 

### PROFILE

I'm a software engineer with a strong passion for building web applications with great user experience.

I currently build websites, web applications that meet complex business requirements and solve engineering problems every day.

### WORK EXPERIENCE

#### Fullstack Developer

SAB Turismo LTD

2024–present

- Improved and developed a backend system with a complex business logic for the company using Python language and Python Flask framework.
- Monitored and controlled all of the dev-ops operations of the company using AWS and such business related software.
- Monitored and implemented basic security measures to achieve safety of the software.
- Took care of the maintenance of the servers for best production speed and security..

#### Frontend Developer

SAB Turismo LTD

2022–2024

- Designed and developed the front-end of web applications utilizing React, Next.js, Sass and other modern framework from concept to deployment.
- Designed and developed web applications such as a CRM system from scratch and several websites with backend communication and SEO functionalities.
- Implemented business logic to align with company procedures and drive growth.
- Analyzed and made improvements on the software products using latest trends and technologies.
- Collaborated with the back-end team to address complex front-end engineering challenges and provided support as needed.
- Utilized latest design technologies such as Figma and provided modern UI/UX designs for robust applications

#### Frontend Developer Internship

Frontend Simplified

2020-2022

- Transformed a static single page application into an interactive user interface using animations, transitions, and carousels.
- Utilized API requests with Axios to dynamically represent data from a cloud server, and used Git version control and the GitHub interface to work in a virtual and collaborative team environment.
- Utilized debugging best practices and simplified difficult programming concepts including responsive website development, CSS layout, Promises, and API requests.

#### Freelance Frontend Developer

Self Employed

2020-2022

- Developed 2 professional websites using HTML5, CSS3, JavaScript, and React. Built scalable ad-serving platform and optimized website performance.
- Implemented SEO, responsive design, multi-platform support, and hosting.
